Undying Dynasties

Doomed by terrible curses, certain kingdoms or civilisations have suffered the grim fate of undeath. Their souls unable to cross the Veil when they die, these dynasties must instead slumber away the centuries in the chambers where they were originally entombed, their mortal remains reanimating when needed to defend their legacy or fight for lost glory. The greatest of such Undying Dynasties is the ancient kingdom of Naptesh, whose frightening armies of ensouled skeletons and statues bring death to any who enter their endless desert.

The most powerful and best known of the undying dynasties is that of Naptesh, whose undead armies still wage eternal war against the Usurper's forces from Hassar to the east. Napteshi agents operate around the world, forming ties with other dynasties that have embraced or succumbed to the eternal slumber.

Through curse or ritual, divine retribution or unbreakable oath, a peoples' door to the afterlife can close, their souls unable to cross the Veil. Instead, they linger on, rising from their tombs in times of strife or to defend their ancient principles.

The Curse of Naptesh

Ancient Naptesh, which flourished in the Golden Age, was the first human empire that arose to compete with the elder peoples of elves and dwarves. Few could stand against its legions of chariots, yet when its greatest ruler, Phatep, was murdered by the conspirators of his diabolical vizier Setesh, the mighty kingdom fell into civil war. Setesh was finally slain, only to unleash a curse that closed the gates of the Thewat – Naptesh's afterlife in the Immortal Realm – and the land sank swiftly into everlasting undeath. To this day, the souls and skeletons of loyal Napteshi continue an endless conflict against those who joined Setesh, the Great Jackal, each side recruiting mortal agents who have sought to influence the destiny of younger nations.

Masters of Necromancy

Necromancy was first discovered and practised in Naptesh. Before the Curse, it provided a means of communicating with ancestors who had already crossed the Veil. During the civil war, the art developed into much deadlier forms, allowing priests and mages to channel large numbers of souls into appropriate vessels – either dead bodies or specially prepared stone statues. For necromantic operations on a large scale, Naptesh's clergy use the legendary Pyramidions – the golden capstones of the pyramids – supposedly forged by the god Hanu. In such a way, great armies of sleeping skeletons and larger constructs can rise from the sands to do battle when needed, sustained as they go by the spells of wizard hierarchs.

Royalty and Clergy

Phatep's formidable queen, Teput, has led Naptesh ever since the king's demise. Beneath her stand the pharaohs of each region and necropolis, with lesser princes and no-

marchs filling the ranks of the royalty. In battle they often ride deadly chariots, the favoured war machine still used by Naptesh more than any other kingdom, pulled now by skeleton steeds. The priesthood is almost equally revered, fulfilling the essential necromantic functions that allow the undying dynasty to endure through the ages. Temple hierarchs and acolytes, magically trained, are key to the operation of any Napteshi army; without them, the necromantic constructs will lose animation.

Ensouled Vessels

While the souls of ancient warriors are returned to their own bones as animate skeletons when possible, Naptesh has also used other vessels that can be powered by one or more souls. The corpses of the larger beasts found in the desert – from giant scorpions to vultures and more – can prove quite potent when needed. Even more devastating are the great statues. Originally a form of artistic glorification of kings, gods and mythical creatures, such constructs can be brought to life: walking colossi, sphinxes and other huge and terrible shapes that feel neither pain nor fear.

Living Tribes

The Curse of Naptesh did not kill its citizens, it merely cut them off from their afterlife. The survivors of the civil war lived on, and their descendants continue today as tribes of desert nomads, the only living people able to cross the desert of Naptesh in relative safety. These mortal Napteshi are at the service of the dead, providing them with new souls and corpses to maintain the ranks of the dynasty when they die. In life, some are trained in combat and espionage, joining the secretive Order of the Rising Sun, pledged to protect Naptesh at home, and also sent out into the world to guide and influence the affairs of other lands. The Order is led by the Oracle of Sameth, said to be an incarnation of the Goddess of War.

Masters of ancient magic, these sorcerers were – and are – priests of Hanu, Napteshi God of Embalming. It was their ability to raise the fallen that saved Naptesh in the civil war. Even today, they alone allow the kingdom's armies to march to battle. To stand before a hierarchy of the Death Cult is to witness the true depths of Naptesh's Curse.

Able to operate either as manoeuvrable skirmishers or in vast, unstoppable battalions, the crew atop the chariot's platform were not only drivers but honoured warriors, and even in death they often form the close retinue of kings and princes.
